## Intermodal 53' Container Fleets - United States (dry, for railroad)

*\* over 100,000 domestic 53' containers added in 7 years. Where is the investment by the railroads in their terminals to accommodate this growth? And this doesn't include the growth of 20/40' traffic. No wonder the congestion and decline in train speeds.*

# Chicago Area Intermodal Rail Terminals

**BNSF-LPC**  
**Elwood, IL**

Empty terminations now return to Lot 16, note the gate entry size and crowding of dropped containers.

Because their Corwith (Chicago) terminal is over burdened and landlocked, BNSF shifted some of that 53' traffic into this LPC terminal. LPC prior was only 20/40' traffic and it too was already over crowded. Now there are 53' cntrs and chassis mixed in, taking up international space, two different intermodal types, lots of complaints.

Waiting to terminate empty at BNSF-LPC Lot 16 (2:04pm - Jan 23, 2019)
